DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carlo Bessone on September 15, 2004.

The application has been amended as follows:

In the Specification,

-page 1, lines 7-9, " , referred to below as circuit arrangement, for short, according to the preamble of claim 1" has been deleted.

In Claim 1,

- line 2, "having the following features" has been changed to --comprising--;
- line 3, before "power factor correction device", -- a -- has been added;
- line 5, before "inverter", -- an -- has been added;
- line 8, after "discharge lamps,", --wherein-- has been added;
- line 10, after "inverter", -- . -- has been added.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a circuit for operating discharge lamps having, inter alia, an inverter which oscillates with an inverter clock cycle which is independent of the PFC clock cycle

Art Unit: 2828

drawing its power from the intermediate circuit voltage, wherein an oscillation of the PFC device is started, by means of a starting device, by an oscillation of the inverter (claim 1). The remaining claims 2-11 are allowed by virtue of their dependencies on the independent claim. Hence, the examiner has allowed claims 1 through 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smith, Patent No. 5,498,936; Gu et al., Patent No. 5,510,974; Liu et al., Patent No. 5,598,326; Rudolph et al., Patent No. 6,677,716; Cho et al., Patent No. 6,316,883; Dellamano et al., Patent No. 5,583,398.

None of the above patents discloses the recited limitation "an oscillation of the PFC device is started, by means of a starting device, by an oscillation of the inverter".
